

FUTURE_SCOPE.md

SynChain Future Scope

Vision

Transform SynChain from a simulation platform into a real-time AI-powered supply chain operating system.

Phase 1

Current Product

Capabilities:

- Supply Chain Simulation
 - Multi-Agent Decision Support
 - Inventory Recommendations
 - Logistics Recommendations
 - Risk Assessment
-

Phase 2

External Intelligence

Capabilities:

- News Monitoring
- Industry Event Tracking
- Market Intelligence
- Economic Indicators

Examples:

- Semiconductor shortages
 - Commodity price spikes
 - Transportation disruptions
-

Phase 3

Predictive Procurement

Capabilities:

- Purchase recommendations
 - Supplier recommendations
 - Procurement timing optimization
-

Phase 4

Supplier Intelligence

Capabilities:

- Supplier scoring
 - Reliability analysis
 - Delay prediction
 - Alternative supplier discovery
-

Phase 5

Enterprise Integrations

Supported Systems:

- SAP
 - Oracle ERP
 - Microsoft Dynamics
 - Zoho Inventory
-

Phase 6

Real-Time Digital Twin

Capabilities:

- Live inventory updates
- Real-time warehouse monitoring
- Continuous simulation

Phase 7

Autonomous Supply Chain

Capabilities:

- Automated replenishment
- Dynamic warehouse allocation
- Automated risk mitigation

Long-Term Goal

Become the operating system for supply chain decision intelligence.
